Tin Nguyen

Software Engineer | Consultant | Open Source Contributor

📍 Germany | Remote & Hybrid | 🌐 nntin.xyz | 📧 nguyen.ngoctindaniel@gmail.com | 🔗 @NNTin

PROFESSIONAL SUMMARY

Full-stack software engineer with 5+ years of experience in backend, frontend, DevOps, and test automation. Proven consultant in automotive, manufacturing, and industrial automation. Active open-source contributor with expertise in building scalable systems and CI/CD pipelines.

WORK EXPERIENCE

Software Engineer – ITQ GmbH | *April 2019 – Present*

- Built **production systems at enterprise scale** serving multiple teams
- Designed **CI/CD pipelines** enabling traceable QA workflows and multi-team collaboration
- Developed **end-to-end test infrastructure** supporting automated quality assurance
- Collaborated on **code reviews** and architectural decisions
- Deployed solutions on **real hardware** in production environments
- Successfully transitioned from on-site to hybrid/remote work model

EDUCATION

Bachelor of Science in Electrical Engineering | OTH Amberg-Weiden | 2011-2016 (Grade: 2.3)

- Thesis: Windows Forms GUI for electrical wire layout design with load simulation

Master of Science - Electronics & IT	FAU Erlangen-Nürnberg	2016-2019 (incomplete)
- Research assistant at FAU	Working student at Siemens Mobility	

TECHNICAL SKILLS

Programming: Python, Java, C#, JavaScript/TypeScript, React, .NET, Vue.js **CI/CD & DevOps:** Jenkins, GitHub Actions, GitLab CI, Azure Pipelines, Docker **Testing:** Unit Testing, Playwright (E2E), Jira + Xray integration **Infrastructure:** VMware, Heroku, Vercel, Debian/Ubuntu VPS

KEY OPEN SOURCE PROJECTS

discord-twitter-bot (2017-2021) | 350+ ⭐ GitHub

- Popular Discord bot with Docker support and Heroku deployment
- Advanced filtering and location-based features

d-zone Ecosystem (2020-Present)

- **d-zone:** Real-time Discord activity visualization with WebSocket + OAuth2
- **d-back:** Python WebSocket backend for live event broadcasting
- **d-cogs:** Red-DiscordBot plugin for Discord event streaming

discord-logo (2018) SVG-based embeddable widget with Vue.js

Reply-Dota-2-Reddit (2016-2018) Reddit bot with Steam/OpenDota API integration

PERSONAL QUALITIES & INTERESTS

- **Adaptable** self-learner with rapid technology adoption skills
- Experience managing large Discord communities and automation workflows
- Passionate about **home automation**, **3D printing**, and open-source software
- Strong **collaborative problem-solving** and mentoring through code reviews
- Enjoys traveling, food culture, and nature

TARGET ROLE

Seeking **full-time backend role** (remote/hybrid preferred)

- Backend/API development CI/CD and test infrastructure Automation AI/ML (emerging interest)

LANGUAGES

German: Native **English:** Fluent **Vietnamese:** Basic
